

Dialora

Cognigy is powerful. For the **wrong** teams.

Months to deploy. No public pricing.
Built for NLU teams, not yours.

dialora.ai

3 reasons teams leave Cognigy.

- Deployment runs months, not days
- Pricing requires a sales call to see
- NLU complexity exceeds team capacity

Top Cognigy alternatives compared.

- 01** Parloa — multilingual enterprise voice
- 02** Genesys Cloud — full CCaaS replacement
- 03** NICE CXone — broad omnichannel AI
- 04** Bland AI — API-driven, usage-based
- 05** Dialora — autonomous calls, days to deploy

Right fit depends on which gap you're solving.

Dialora

Calls Cognigy routes to **agents**. Every time.

The coverage gap no NLU platform fills:

- After-hours inbound calls
- Outbound follow-up sequences
- Live call lead qualification
- Appointment booking on live calls

dialora.ai

Dialora

What Dialora does that Cognigy does not.

24/7 autonomous inbound **Dialora**

Outbound AI call campaigns **Dialora**

Live call lead qualification **Dialora**

Plug-and-play in days **Dialora**

Transparent public pricing **Dialora**

dialora.ai

Dialora

DIALORA DEPLOYS IN

Days

Not months. Not quarters. Days.

Cognigy: **months** of NLU implementation required.

Dialora: plug-and-play. First autonomous call in days.

dialora.ai

Dialora

Two problems. Two different platforms.

COMPLEX HUMAN-ASSISTED FLOWS

Cognigy. NLU orchestration built for enterprise multi-channel operations.

CALLS WHEN AGENTS ARE NOT THERE

Dialora. Autonomous call handling. No agents required.

dialora.ai

Dialora

Routing calls your AI could **handle?**
